APPENDIX I

PESTICIDE FIELD MONITORING DATA

APPENDIX I

PESTICIDE FIELD MONITORING DATA

The data presented within this appendix is compatible with the data requirements of the SAROAD (Storage and Retrieval of Air Quality Data) developed at EPA, and is presented in such a manner that the data may be directly keypunched.

One exception should be noticed at this point. Where concentrations are less than the minimum detectable limit, zeros have been placed in the measured value spaces. For convenience, zero has been placed in the Decimal Position (D.P.) space. The accepted SAROAD system uses a 9 in the D.P. space instead of zero to indicate value less than the detectable limit.

In order to obtain the measured value in nanograms per cubic meter, it should be remembered that the D.P. value indicates the number of figures to the right of the decimal.
